Professional Summary

Full-Stack Developer focused on AI-powered applications, scalable backend systems, and cloud-native architectures. Experienced with MERN, Retrieval-Augmented Generation (RAG), vector databases, Kubernetes, Docker, CI/CD, and real-time systems. Built monolithic and microservices-based applications with strong focus on backend engineering, system design, and AI infrastructure.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript
- **Frontend:** React.js, Tailwind CSS, Redux Toolkit
- **Backend:** Node.js, Express.js, REST APIs, JWT, OAuth, Socket.IO
- **AI/ML:** RAG, LangChain, Embeddings, Semantic Search, LLM Integration
- **Databases:** MongoDB, Mongoose, Pinecone
- **Architecture:** Monolithic, Microservices Architecture
- **DevOps/Cloud:** Docker, Kubernetes, CI/CD, GitHub Actions, Nginx, GitHub Codespaces
- **System Design:** Redis Caching, Rate Limiting, Load Balancing
- **Testing/Tools:** Jest, Postman, Git, Vercel

Projects

- **DataNest AI — Knowledge Management System** Live
 - Built an AI-powered platform to store and retrieve PDFs, images, and links using semantic vector search.
 - Designed a monolithic backend architecture with Retrieval-Augmented Generation (RAG) pipeline.
 - Integrated Mistral AI and Google Gemini for intelligent context-aware querying workflows.
 - Improved backend efficiency with Redis caching and request rate limiting.
 - **Tech:** React, Node.js, MongoDB, Pinecone, Redis, D3.js
- **Cloud IDE — Kubernetes-Based Development Environment** GitHub
 - Built a Kubernetes-powered cloud IDE provisioning isolated React/Vite sandbox environments on demand.
 - Designed scalable microservices architecture with dedicated auth, AI, router, and sandbox orchestration services.
 - Integrated AI-assisted file editing using LangChain, Mistral AI, and real-time SSE streaming.
 - Implemented live terminal communication and preview routing using Socket.IO and reverse proxy architecture.
 - Containerized multi-service applications using Docker and managed deployments with Kubernetes.
 - Utilized GitHub Codespaces for cloud-based development and multi-service workflow management.
 - **Tech:** React, Node.js, Docker, Kubernetes, LangChain, Mistral AI, MongoDB
- **Doramon AI — RAG Chat Application** Live
 - Built a scalable AI chat platform supporting document querying across PDFs, images, and text files.
 - Implemented Pinecone vector search for Retrieval-Augmented Generation (RAG) workflows.
 - Developed real-time multi-user communication using Socket.IO.
 - Integrated Mistral AI and Google Gemini for intelligent conversational responses.
 - Optimized backend scalability using Redis caching, rate limiting, and load-balanced architecture.
 - **Tech:** React, Node.js, Express.js, MongoDB, Pinecone, Redis

Education

Bachelor of Computer Applications (BCA) 2023 – 2026
Chaitanya Deemed to be University, Hyderabad

Certification

Full Stack MERN Development

Sheryians Coding School
